

The Dragon's Tooth™

Used at the Louisiana Superdome and Houston's Reliant Park, this barrier has been specifically designed to rotate and overturn upon impact, causing a high-center effect and potentially immobilizing any oncoming vehicle.

FEATURES:

- 3'-6" (W) x 3'-0" (D) x 2'-8" (H)
- Approx. 1400 lbs. per Barrier
- Class P Concrete, Min. 5000 PSI
- Aesthetically Pleasing
- Custom Finishes and Attachments
- Patent Pending

APPLICATIONS:

- Vehicle Barricade – Block off streets and entrances, and still allow pedestrian traffic.
- Continuous Barricade – Join individual barriers with wire rope cable to create a continuous vehicle barricade.
- Fence Barricade – Attach chain link fencing to create a temporary vehicle and pedestrian barricade. Bury the fence posts to create a permanent barricade.
